

The CQA Company™ will be attending the 2018 RQA Annual Conference, taking place at Manchester Central during the 31st October-2nd November 2018.

This year's conference programme is both interactive and stimulating and carries the theme Data and Quality: Is the tail wagging the dog? Delegates will be drawn from around the world and will enjoy plenary and stream presentations, QA Clinics, interactive sessions, workshops and excellent networking opportunities. This global conference provides an opportunity to share best practices, to consider different quality tools as well as hearing from regulators and other key opinion leaders on their views on challenging global quality boundaries.

The CQA Company™, part of TCTC Group™ is delighted to be participating in the event, joining leading organizations in building new connections, collaborations and partnerships.

TCTC Group™ is a privately owned full-service clinical research provider specialized in bringing products with unique clinical, medical and regulatory complexities to market. In addition to offering full-service clinical trial solutions, the group includes independent divisions specialized in quality assurance, medical writing and regulatory affairs, project and site management, staffing and training services. TCTC Group™ are experts in advanced therapies and successfully executed clinical trials for the first Gene therapy to be approved in the Western world. The group also has a CNS-dedicated clinical development team conducting trials in the most complex neurological and psychiatric conditions.

The TCTC team is available to discuss your requirements and will be pleased to assist you with getting your product to market in the most cost-effective and time-efficient manner.

Notes for Editors:

About The CLINICAL TRIAL Company™ Group:

The Clinical Trial Company group was formed in the UK in 2002. The founders of TCTC realized there was an opportunity in the CRO sector for a company which targeted medium size clinical trials and novel products which lacked a classical road map to the market. Large CROs prioritize studies from the big pharmaceutical companies, for good business reasons. However, this approach sometimes disadvantages their smaller clients who are equally keen to complete their clinical trials quickly.

Its Directors and experienced management team offer comprehensive client-side experience to global players. This offering appeals to people unhappy with delays caused by conventional off-the-shelf approval strategies which ignore the unique nature of each product and market.

TCTC has its Group headquarters near Manchester (UK) with additional offices in Stirling (UK), San Mateo (USA), Montreal (Canada), Sydney (Australia) and Singapore. TCTC has operating divisions covering all aspects of drug development which include **The CLINICAL TRIAL Company™**, **The REGULATORY AFFAIRS Company™**, **The CQA Company™**, **The CRA Company™**, **The CNS Company™**, **The Clinical Training Company™** and **The CLINICAL DATA MANAGEMENT Company™**.
