

**24<sup>th</sup> April 2015**

**The CLINICAL TRIAL Company™ incorporates Australian Business.**

**The Clinical Trial Company (ANZ) Pty Ltd (Sydney, Australia);** is delighted to announce the incorporation of a new Australian business. The Clinical Trial Company™ has had an office in Sydney since 2008. The new company has been created to meet the needs of TCTC's growing number of Australian clients and sponsors.

Ewan Campbell, Director and Founder of TCTC stated, "We are delighted to announce the incorporation of our Australian company. We now have an Australian entity to supplement our growing global Contract Research Organization that was established in 2002 and intend to provide Australian sponsors with the same high level of customer service our other throughout the world clients have enjoyed for several years now." TCTC will continue to grow operations in Australia and New Zealand and are currently planning to open a new office in Melbourne.

TCTC provides clinical contract research services to the pharmaceutical, biotech and medical device industries and is expert in advanced products areas such as cell and gene therapies as well as orphan drug indications. TCTC ran the clinical trials for the first gene therapy medicine to be approved in the western world. The company has some of the largest pharmaceutical companies in the world as clients and is also able to provide a tailored drug development service to smaller companies bringing new drug and device products to market.

TCTC was awarded The Queen's Award last year to acknowledge their significant expansion of sales worldwide. The remarkable growth of The Clinical Trial Company is, in part, because it is a quality driven company having achieved ISO 9001-2008 certification.

The TCTC motto of 'Treat every client as if they are our only client' and the dedication and professionalism of our teams has allowed TCTC to develop a loyal and ever growing customer base since 2002.

## Notes for Editors

### About The Clinical Trial Company Ltd.:

The Clinical Trial Company Ltd. (TCTC) was incorporated in 2002. The TCTC founders realised an opportunity existed within the CRO sector for a company targeting medium size clinical trials and innovative products which lacked a classical road map to the market. Large CROs prioritise studies from the big pharmaceutical companies, for good business reasons. However, this approach sometimes disadvantages their smaller clients who are equally keen to complete their clinical trials quickly.

TCTC specialises in advanced therapy drugs such as cell & gene therapy as well as first in class biotechnology products. These types of investigational drugs often do not follow the classical road map to approval. They are also often orphan drugs which are targeted at meeting the unmet clinical needs of rare diseases.

TCTC has an experienced management team that offers extensive experience working with the EMA, FDA and MHRA to all their clients. Customer satisfaction is the key to our success as we always aim to provide our clients with efficient resource management and an alternative to conventional off-the-shelf approval strategies which ignore the unique nature of each product and market.

The TCTC has its Group headquarters in Pickmere, Knutsford, Cheshire (UK) with additional offices in San Mateo (USA), Berlin (Germany), Montreal (Canada), and Sydney (Australia). TCTC has operating divisions covering all aspects of drug development which include [The CRA Company](#)<sup>™</sup>, [The Regulatory Affairs](#)<sup>™</sup> [Company](#)<sup>™</sup>, [The Clinical Training Company](#)<sup>™</sup>, [The CNS Company](#)<sup>™</sup> and [The CQA Company](#)<sup>™</sup>.
